Lavette Super

The All-Time Champion Wipe.

Lavette Super outperforms all other wipes by achieving the ultimate hygienic result.

Its unique open structure guarantees superior dirt pick-up and efficient absorption. The wipe dries quickly and thus remains clean and fresher for longer, providing optimal hygiene with minimal odours.

Lavette Super's unique fibre and binder composition creates an antibacterial performance preventing bacterial growth, thus ensuring the cloth is safe to use.

Lavette Super can be used in combination with any cleaning agents or disinfectants. It is a multi-purpose wipe that can be used, rinsed and washed over and over again and is therefore both economical and efficient.

Lavette Super is available in 5 different colours, supporting HACCP (Hazard Analysis Critical Control Points) conditions. Lavette Super colour coding can help you in preventing cross-contamination and contribute to improved health & safety.

- Heavy duty multi-purpose wipe
- Open structure - Superior dirt pick-up
- Easy to rinse & dries quickly - Wipe stays fresher for longer
- Antibacterial performance
- Bulky - Comfortable to use
- Colour coded - Helps you achieve HACCP compliance
- Machine washable - Ready for use over and over again
- Durability - Excellent value for money
- Strong and safe to use - FCC approved!

Use Lavette Super and be safe!

HACCP

(Hazard Analysis Critical Control Points)

Lavette Super wipes are designed to provide the ultimate cleaning, wherever hygiene is crucial and HACCP standards need to be maintained.

HACCP working conditions are set to systematically identify, control and prevent potential hygiene-related risks.

The use of different colours give you the opportunity to set up a cleaning performance system where each colour has a specific cleaning area and task. This way the risk of using a contaminated cloth in a hygiene environment can be eliminated.

The below mentioned colour coding scheme is an example for a restaurant.*

Colour		Cleaning area
Blue		General restaurant areas; e.g. tables, trays etc.
Red		Washrooms, floors and toilets
Yellow		Disinfection of kitchen appliances; e.g. knives etc.
Green		Kitchen and food preparation areas
White		Other general cleaning.

* This is advisory, not mandatory.

FCC Approval

Food Contact Clearance = Food Safe!

Lavette Super New Generation wipes passed all the tests and are in compliance with the rules and regulation (EC) No 1935/2004 of the European Parliament on materials and articles intended to come into contact with food.

What does this mean?

It means that it's safe to use Lavette Super New Generation as a cleaning cloth even if the wipe comes into direct or in-direct contact with dry, moist or non-greasy foodstuffs. There is no danger for health and safety. Thus, if cleaning in areas where food is prepared or otherwise present, it is in your best interest to make sure that an FCC approved wipe is used.

Main Uses:

- Industrial Kitchens
- Catering
- Hotels
- Restaurants
- Food Processing Industry

Cleanliness is a competition, with Lavette Super you win every time!
